

Expected State of Data/Meta-Data from Field

Shot/Source information:

The following should be in dep file format, from the pocus program, TSP input file format or in spreadsheet form:

- time of shot/source
- id of shot/source
- latitude of shot/source
- longitude of shot/source
- elevation of shot/source
- size of shot in kg or magnitude of source
- depth below surface of shot/source
- comments (if applicable)

Receiver/Station information:

The following should be in dep or TSP format or in spreadsheet form:

- id of station
- serial number of receiver
- manufacturer and model of receiver
- type of sensor attached
- latitude of station
- longitude of station
- elevation of station
- comments (if applicable)

General information about experiment:

The following should be in a text or word document:

- principal investigators names
- principal investigators institutions
- experiment name
- experiment nickname
- paragraph describing purpose of experiment
- paragraph describing layout of instruments

Raw data files:

- all raw data files
