Employment Opportunity at IRIS PASSCAL: Staff Scientist/Software Engineer

**JOB DUTIES:**

Develop and maintain software that is used on or to facilitate seismological experiments. IRIS PASSCAL software includes tools to: interface with seismic data loggers, test equipment, convert between data formats, analyze state-of-health information, manage inventory and maintenance, and schedule equipment. The software engineer will also be responsible for providing user support to both PASSCAL staff and the IRIS community. The software engineer will have opportunities to conduct training and do seismological fieldwork.

**REQUIRED QUALIFICATIONS:**

Applicants should submit a resume, official college transcripts, a letter of professional interests, and the names and addresses, email addresses, and phone numbers of three references to: IRIS PASSCAL Software Engineer, c/o Human Resources, Brown Hall Box 030, Socorro, NM 87801-4796.

or email application and include job title as subject line to:
